Standard Accessories: Air Hose Nipple.
Recommended Air Pressure: 85 psi (6kg/cm²)

⊙ Optional Anvil of 1-1/2" is available.
※ Optional Anvil of 2-1/2" is available.

IMPORTANT!!

- ★ **Air Pressure:** Air Pressure of 85 psi (6kg/cm²) is recommended for the most efficient performance. Too high air pressure will shorten tool's life.
- ★ **Lubrication:** For Air Motor — Supply light Spindle Oil properly through Air Inlet or Line Oiler every before and after operation. (For examples, MOBIL SPINDLE OIL NO.1, SHELL SPINDLE OIL 60 and or equivalent.)
- For Impacting Part: Supply recommended high quality Grease properly (for examples, SHELL ALVANIA NO.2, SHELL ALVANIA EP, MOBILPLEX 2, MOVILPLEX 47, and or equivalents.) once every three months and when the tool is overhauled. Over-greasing will cause dull motion or heating.
- ★ **Dry & Clean Air:** Drain daily, and install Filter at or near the take-off point to prevent trouble from foreign matter.
- ★ **Air Hose & Joints:** Use Air Hose (the shorter, the better), Joints and other fittings of good condition and of proper size to avoid pressure drop.
- ★ **Sockets:** Do not use Sockets which are worn at female square where Anvil fits in.
- ★ **Anvil & Hammer:** Replace Anvil & Hammer together when either of them is found worn.
- ★ **Genuine Parts:** Use only URYU's genuine spare parts for replacement.
- ★ **Regular Overhaul:** Regular overhaul of once every three months is recommended to keep sufficient performance and to prevent trouble.
